Hey, I'm Nila. I am American expat that grew up encouraged to be a strong creative individual. I've always been in love with art and using visuals as a way to communicate. I started interested in classical art, photography, writing and graphic design. I'm currently a VFX artist and compositor who studied in two programs at Hyper Island. I am a bit of a nomad and love to travel about. I'm on the constant search for an innovative environment that values my honest and fresh perspective. I'm a curious person who is always eager to learn and looking to level up in life. I'm keeping my eye open for new opportunities and if you're interested take a look at my websites and contact me up if you like what you see.

I'M ALWAYS EAGER TO GRAB A QUICK COFFEE AND CHAT.
